Description:

A medium sized variety, presenting thick, shiny green leaves with wide cream margins that mature to pure white; large, pure white flowers with a sweet scent emerge in mid to late summer; plant near a patio or walkway to enjoy its fragrance

Ornamental Features

Royal Wedding Hosta features dainty spikes of fragrant white tubular flowers rising above the foliage from mid to late summer. Its attractive textured oval leaves remain dark green in colour with distinctive white edges and tinges of bluish-green throughout the season. The fruit is not ornamentally significant.

Landscape Attributes

Royal Wedding Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Royal Wedding Hosta is recommended for the following landscape applications;

- General Garden Use
- Groundcover

Planting & Growing

Royal Wedding Hosta will grow to be about 12 inches tall at maturity extending to 18 inches tall with the flowers, with a spread of 20 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
