Height: 20 inches

Spread: 16 inches

Spacing: 14 inches

Sunlight: ○ ◐

Hardiness Zone: 4a

Description:

A heavily blooming selection featuring large double flowers with frost-like white petals; vigorous, with a perfect mounding habit and strong re-blooming throughout the season; a beautiful addition to the garden when massed

Ornamental Features

Mt. Hood Shasta Daisy has masses of beautiful double white daisy flowers with gold eyes at the ends of the stems from early to late summer, which emerge from distinctive buttery yellow flower buds, and which are most effective when planted in groupings. The flowers are excellent for cutting. Its serrated narrow leaves remain dark green in colour throughout the season.

Landscape Attributes

Mt. Hood Shasta Daisy is an herbaceous perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It is a good choice for attracting butterflies to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Mt. Hood Shasta Daisy is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Mt. Hood Shasta Daisy will grow to be about 16 inches tall at maturity, with a spread of 16 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Mt. Hood Shasta Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
