

Manzano Bigtooth Maple

Acer grandidentatum 'Manzano'

Height: 30 feet

Spread: 30 feet

Sunlight: ☉

Hardiness Zone: 4

Other Names: Canyon Maple, Wasach Maple, Western Sugar Maple

Description:

This is a very hardy variety which thrives well in dry conditions and urban pollution; a broad, rounded growth habit with a showy display of yellow, orange, and red in the fall; a great landscape or street tree

Ornamental Features

Manzano Bigtooth Maple is primarily valued in the landscape for its ornamental globe-shaped form. It has rich green deciduous foliage. The glossy lobed leaves turn outstanding shades of yellow, orange and red in the fall. The furrowed gray bark adds an interesting dimension to the landscape.

Landscape Attributes

Manzano Bigtooth Maple is a deciduous tree with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree, and should only be pruned in summer after the leaves have fully developed, as it may 'bleed' sap if pruned in late winter or early spring. It has no significant negative characteristics.

Manzano Bigtooth Maple is recommended for the following landscape applications;

- Accent
- Shade

Planting & Growing

Manzano Bigtooth Maple will grow to be about 30 feet tall at maturity, with a spread of 30 feet. It has a low canopy with a typical clearance of 4 feet from the ground, and should not be planted underneath power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 80 years or more.

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type, but has a definite preference for acidic soils, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
